👤 Profile

Senior Mobile Developer with **6+ years** of experience in cross-platform and native mobile development, specializing in Flutter and Java. Experienced in building scalable production applications, leading development teams, designing maintainable architectures, integrating secure payment systems, and delivering high-quality mobile solutions across e-commerce, service platforms, and enterprise products. Strong background in Clean Architecture, SOLID principles, CI/CD pipelines, performance optimization, and mobile software lifecycle. I am also **leveraging modern AI-assisted development tools** to accelerate delivery, improve code quality, and optimize development workflows.

📁 Professional Experience

09/2023 – present Alexandria, Egypt	Senior Flutter Developer Enegix Enegix • Migrated native Android/iOS applications to Flutter while preserving full feature parity, UI consistency, and production stability. • Applied AI-assisted development workflows to accelerate implementation, debugging, and technical documentation while maintaining high code quality standards. • Integrated REST APIs, Firebase, Adjust, MoEngage, Gameball, and multiple third-party SDKs. • Implemented secure payment integrations including Apple Pay, Paymob, Moyassar, and K-net. • Leveraged advanced Figma workflows with Cursor MCP to translate UI/UX designs into production-ready Flutter interfaces. • Designed scalable application architecture following Clean Architecture and SOLID principles. • Improved application performance, resolved production bottlenecks, and enhanced runtime stability. • Collaborated closely with product managers, backend engineers, and stakeholders to deliver production features efficiently.
05/2021 – 11/2023 Alexandria, Egypt	Senior Flutter Developer Adwat Information Technology Adwat Information Technology • Led Flutter team development and conducted code reviews. • Mentored team members through technical sessions twice weekly. • Integrated authentication providers including Facebook, Google, Apple, and Twitter. • Improved engineering communication between mobile, backend, and product teams.
08/2020 – 05/2021 Alexandria, Egypt	Flutter Developer Grandtk Grandtk. • Implementing UI/UX designs: Translating design mockups into pixel-perfect UI implementations, ensuring a smooth and visually appealing user experience. • Implemented CI/CD pipelines to automate testing and deployment, reducing release cycles and improving efficiency. • Leading Flutter application development: Taking a leadership role in designing, developing, and maintaining high-quality Flutter applications.

03/2020 – 06/2025

Remote

Flutter Developer | Mostaq

Mostaq

- Utilized **state management solutions** (Provider, Bloc) to improve app performance and maintainability.
- Collaborated with clients worldwide, gathering requirements, providing technical consultations, and delivering high-quality applications within deadlines.
- Optimized app performance by reducing app size, improving load times, and fixing memory leaks.

Projects

Trolley E. Commerce

E. Commerce App

A full-featured grocery e-commerce platform serving the Kuwait and GCC market. It offers smart product search, multi-payment checkout (KNET, Apple Pay, Card, Cash), home delivery and in-store pickup, a digital wallet, loyalty rewards, premium subscriptions, in-store scan-to-pay, and DHL international shipping. **Trolley is part of a larger retail ecosystem** that includes a Picker App for order fulfillment, a Label Print App, a Barcode Scanner App, and a POS System. [\[App Store\]](#)  [\[Google Play\]](#) 

Ezhalha

Cars Service Apps (Two separated apps user and service provider.)

The number one and only super app in the Middle East that serves you and your car in one platform delivery services.

User App : [\[Google Play\]](#)  [\[App Store\]](#) 

Provider App : [\[Google Play\]](#)  [\[App Store\]](#) 

- Successfully integrated multiple car service features including maintenance booking and emergency assistance.
- Achieved a high user satisfaction rate of 95% based on recent surveys.
- Implemented a user-friendly interface that boosted user engagement.

Ole Coffee

Ordering & Loyalty App

Cross-platform mobile app for a multi-branch coffee chain featuring Google Maps branch discovery, Algolia-powered search, configurable menu ordering with 4 payment methods (Google Pay, Apple Pay, KNET, Wallet), tiered loyalty program, digital wallet, social gifting, and push notifications. Architected using Clean Architecture with 17 feature modules, Provider state management, and GetIt DI. Integrated Firebase Analytics/Crashlytics, Sentry monitoring, and Shorebird OTA updates. Go care & Go care business

Beauty Services App

- A program to link service providers and beneficiaries within the scope of women's beauty centers, in order to complete service operations according to their type and the possibility of booking.
- **Client App :** [\[Google Play\]](#)  [\[App Store\]](#) 
- **Service Provider App :** [\[Google Play\]](#)  [\[App Store\]](#) 

Skills

- **Programming Languages:**
Dart, Java, Swift, Kotlin
- **Architecture & Patterns:**
Clean Architecture, MVVM, MVC, SOLID, OOP
- **Development Tools:**
Git, Bitbucket, Cursor, Figma
CI/CD with Codemagic and GitHub Actions
- **Software Engineering:**
Agile Methodologies, Problem Solving, Data Structures, Algorithms
- **Analytics & Monitoring:**
Adjust, Firebase Analytics, Firebase Crashlytics, Sentry
- **Mobile Development & Integrations:**
Flutter, Firebase, REST APIs, Google Maps, Online Payments, Push Notifications, Deep Linking, Custom Animations / UI
- **State Management:** Provider, Bloc, Cubit
- **AI Productivity:**
AI-assisted Development
Code review
Development Workflow Optimization
- **Notifications & Engagement:**
OneSignal, MoEngage, Firebase Messaging
- **Deployment:**
App Store / Play Store Release Management

Education

- | | |
|--|---|
| 09/2016 – 09/2020
Aelxandria, Egypt | Bachelor Of Science, Computer Science (Special degree)
Faculty Of Science, Alexandria University
3.4 GPA (Very Good) |
| 06/2019 – 09/2019 | ITI Internship for undergraduates
Information technology institute
An internship for undergraduates in cross-platform mobile apps development using Ionic & Angular, it was only for 2 months. |

Languages
